A highly motivated student with a strong passion in technology especially for hardware and software development. Possesses a solid foundation in algorithm logic, data structures, and computational problem-solving. Highly adaptable to a new programming languages and technologies, and eager to contribute collaborative in software development life cycle

Education

Bina Nusantara University (2024 - Present)

Bachelor of Computer Science (3.45)

Relevant Course: Software Engineering, Machine Learning, Human Computer Interaction, Database Technology, Operating System, Algorithm and Programming, Automation Testing

Experience

Juan-Port.me - Frontend

- Developed a fully responsive front-end web portfolio styled a futuristic space using HTML, CSS, JavaScript and seamless email routing.
- Designed a modern dark-mode UI featuring neon glassmorphism aesthetics, custom DOM cursor tracking, and scroll-reveal animations.

KasaZa - Full Stack Web Developer - Agile

- Developed a high-performance, single-page Point of Sale (POS) and inventory application using React, Vite, and Firebase, featuring seamless real-time data synchronization across multiple devices independently.
- Designed a premium, fully responsive UI utilizing modern glassmorphism aesthetics, custom CSS variables, and an interactive data analytics dashboard.
- Engineered a robust multi-branch management system equipped with Role-Based Access Control (RBAC), integrated camera barcode scanning, and dynamic receipt generation.

WomenSpace - Full Stack Web Developer & Machine Learning

- Collaborate with a team to Develop a full-stack social media platform for women using Flask, JavaScript, SQLite, and JWT authentication, featuring user-generated content, social interactions, and personalized content feeds.
- Engineered secure user authentication and profile management systems with JWT-based authorization, account verification workflows, and media upload capabilities.
- Implemented core social networking features including posts, replies, reposts, likes, follow/unfollow functionality, search, trending content discovery, and ML-based face verification integration.

Leadership

Head of Event Committee - "We Grow Together" Gathering

- Managed event planning and coordinated committee members to ensure the successful delivery of the "We Grow Together" gathering.

Treasurer – New Student Admission Committee, Keluarga Mahasiswa Katolik Bekasi Region

- Handled budget allocation, expense monitoring, and financial accountability for KMK New Student Admission activities in the Bekasi Region.

Activist of Keluarga Mahasiswa Katolik Bekasi Region- Sports and Arts division

- Planned and executed various events and activities to promote sports and arts within the community.

Member of Himpunan Mahasiswa Teknik Informatika (HIMTI)

Member of Teach for Indonesia Student Community (TFISC)
